

APPENDIX 4.4b. Examples of badgers being TRANSLOCATED to or PROTECTED on estates.

Date	Locality	Grid ref.	Comments	Source
1881	Marr	SE/5105	In the last named localities [Marr ...] it has been extinct and the habitats restocked by specimens being turned down.	Clarke & Roebuck (1881)
1881	Conisbrough	SK/5-9-	In the last named localities [Conisbrough ...] it has been extinct and the habitats restocked by specimens being turned down.	Clarke & Roebuck (1881)
1881	Watchley Craggs	SE/4706	In the last named localities [Watchley Craggs ...] it has been extinct and the habitats restocked by specimens being turned down.	Clarke & Roebuck (1881)
1881	Brockadale	SE/4917	In the last named localities [Brockadale ...] it has been extinct and the habitats restocked by specimens being turned down.	Clarke & Roebuck (1881)
1881	Yorkshire		As a straggler it has been found in various localities throughout the county, but many of these have been escaped or introduced specimens.	Clarke & Roebuck (1881).
22.04.1884	Wortley	SK/3099	Male badger weighing 35lb caught alive. It was eventually released on Lord Wharnccliffe's Wensleydale property.	Bradey (1884)
1885	Clough Wood, Fossdale		Two badgers introduced by Lord Wharnccliffe seen last week.	Lees (1885)
1886	Hutton Hall	NZ/6014	Several badgers were 'turned out' in the woods around Hutton Hall, the seat of Sir J. W. Pease.	Nelson (1886a).
1890	Hutton Woods, Ingleby Greenhow	NZ/4500	Several released in Hutton Woods some years since by Sir J. Pease	Anon.(1890b)
1895	Leeds	SE/2734	Badger found in the Burley district was thought to have escaped from captivity.	Anon. (1895b)
1907	Fyling Hall	NZ/9304	The badger has much increased in numbers and also in range of late years. This is doubtless from the protection it has received on this estate.	Barry (1907).
01.08.1908	Osmotherly	SE/4595	Not uncommon along escarpment. Now protected on J. S. Barwick's estate.	Booth & Fortune (1908)
1912	Arncliffe	SE/4599	Thanks to the preservation by the late Sir I. L. Bell and his son Sir Hugh Bell, badgers pad marks are not infrequently seen.	Blakeborough (1912)
1920	Upper Wharfedale	SE/0-5-	All the known badger colonies appear to be in a thriving condition; this is due mainly to the kindly preservation by friendly landowners.	Smith (1921)
10.07.1920	Kirkham Abbey	SE/7366	2 colonies on estate, carefully preserved by Sir A.E. Brotherton (keeper Mr. Brigham).	Brotherton (1920)
