Evidence for shale, stone, textile, bone and copper alloy manufacture are common. Iron smithing is less common and the presence of items such as amber, silver and coral occasional. There are five more excavated sites in East Lothian which are not included here since they yielded no artefacts; Prestonpans (West Loan), Seacliff and Seacliff 2, South Belton and Thistly Cross.

Abbreviations: Y= present, N= absent; m/f= manufacture; CuA=copper alloy; Fe= iron; S= silver; f= flint; s= saddle; r= rotary.
